WORK EXPERIENCE

LUNEX

Lecturer

Luxembourg

2024, Oct. – Nov.

- Teach health economics: Operational health management as an investment
- Provide an understanding of how healthcare markets work
- Explain public health economics and the government's role

University of Luxembourg

Research Assistant

Luxembourg

2019, Feb. – Sep.

- Data collection and data analysis
- Employed a continuous time heterogeneous-agent model to characterize the asymptotic distribution of wealth
- Used a finite-differences approach, employing dynamic optimization with an implicit method
- Examined the trade-off and calibrated the model, revealing a moderate level of wealth as the second-best optimal outcome

World Gold Council

Researcher

London, UK

2018, Jul. - 2021, Sep.

- Contributed to the development of the gold market in Russia
- Conducted research utilising Big Data analysis methodologies
- Investigated the rationale behind investing in gold within Russian Non-state Pension Funds (NPFs)
- Explored the role of gold within NPFs portfolio
- Conducted a straightforward back-test of the representative portfolio of NPFs using 15 years of historical data
- Examined the risk and returns of NPFs over 10-15 year periods

Vermont, USA

2016, Sept. - Dec.

- Contributed to cultural and educational exchange across NGO based in Vermont

- Developed and implemented an English teaching methodology tailored for Chinese students aged 8 to 19

WORKING PAPERS

- The Impact of Public-Private Partnership on Facility Management Costs: Evidence from the Healthcare Sector in England:*
 - Utilised the ERIC panel dataset spanning from 2018 to 2021
 - Evaluated how hospital procurement type affects the costs of both hard and soft facility management services
 - Employed OLS, 2SLS, PSM, Hausman-Taylor estimations and machine-learning techniques
- Facility Management Services in UK Hospitals: In-house or Outsourcing:*
 - Examined the institutional organization of UK hospitals through both traditional procurement and private finance initiatives (PFIs)
 - Developed an applied principal-agent model for the UK healthcare sector
 - Discovered when, under PFI or traditional procurement, it is more beneficial for the UK government to outsource or deliver facility management services in-house
- Healthcare Provider Efforts vs Fees: Striking the Right Balance:*
 - Searched for an equilibrium within the framework of a repeated game with imperfect public monitoring under double moral hazard
 - Examined an optimal relational contract by solving the game in a stationary environment
